Preferential origin and provenance

Dear partner,

Unfortunately, we cannot issue an official statement for preferential origin and provenance.

Many of our products are sourced from multiple suppliers, depending on price, delivery time and other influential situations. This makes it practically impossible to sign a statement with the country of origin for our products.

Though we have a preferred supplier for our trade items and we can provide the country code for them. This does not mean 100% that the products will also come from here.

We have made an overview of our products including the country of original origin for our preferred suppliers. This list includes the HS-codes.

Sincerely,

Sinatec Europe B.V.

Quality management
